

Weekend:

Ryan & JJ working on the model:

Ryan: Choose Spot; need to establish what happens when user chooses a cell.

Ryan: Blank spots & #'s (ask JJ)

JJ: Filling the Array

JJ:

Steph: write array

Steph: Draw the board & display the board

Sabrina: working with Steph

Sabrina: working on Console writelines

Sabrina: write the Main()

We are using JJ's standard user input so we do not have to write that portion

To do: generate win/loose

To do: present solution

Monday To Do's:

Sabrina: Input Console.Writelines into merged code.

Sabrina: Go through all code and make sure all Console.Writelines are user friendly.

JJ & Ryan: If we can, populate our code on the TV and go through it with me and Sabrina

Steph: continue to merge the completed code into the Midterm Testing file.

Everyone: work on Tuesday's presentation plan.

JJ & Ryan: working on update board code together.

Everyone: testing

Steph & Sabrina: continue loop

Tuesday to do's:

Steph: merge code and fix bugs.

Sabrina: create SetName() method in playgameR file.

Sabrina: merge CW's into PlayGameR

Everyone: testing testing testing!
